

**Residential Concerns Committee
Green Infrastructure Working Group**

Update as of 11/30/2024

Update

- ▶ Green Infrastructure Working Group - November 14th
Educational Forum - Megan Noe Fellows
- ▶ Green Infrastructure WG Planning meeting held
November
 - ▶ Donated Land Project - Notes attached

Hosted Zoom only Educational Forum

Guest Speakers Meghan Fellows

Meghan Noe Fellows is the Director of Science and Restoration and serves as the Vegetation Ecologist for the team. For the last few years she's focused on rewilding the home landscape through planting native "pocket forests."

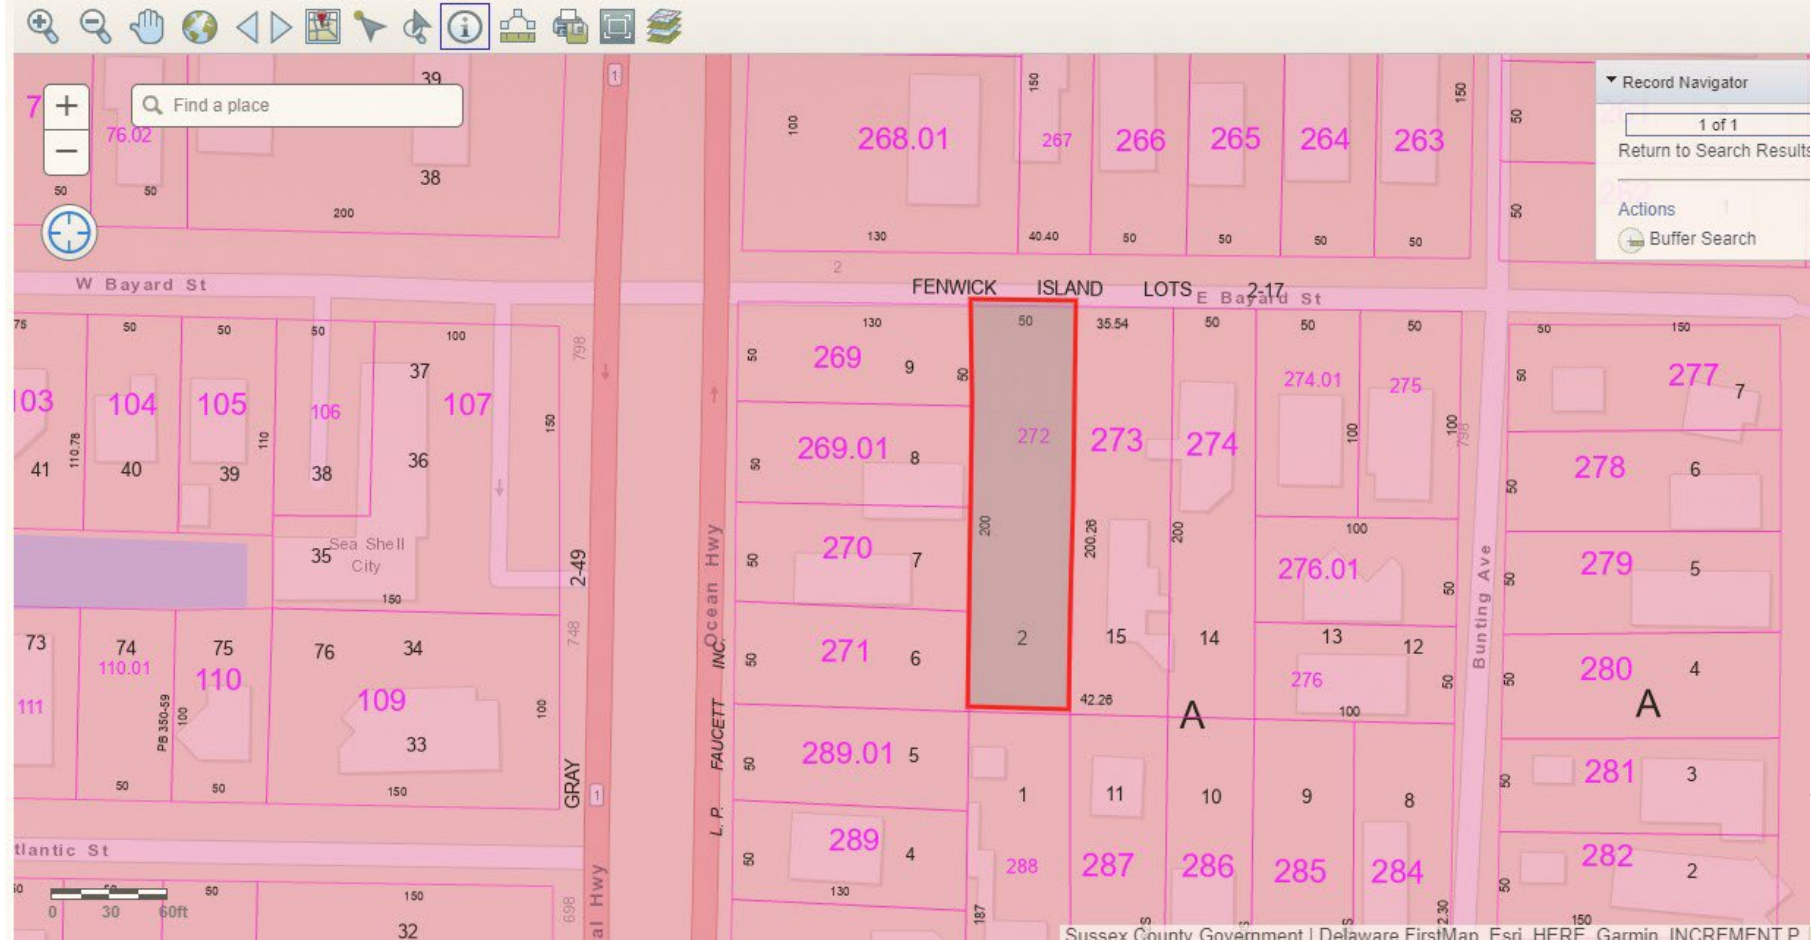

- ▶ Provided information on both living shorelines and pocket forests.
- ▶ We recorded the entire session and the link is posted on the Fenwick Island Town website.
- ▶ Had many good questions from some homeowners who participated on the call.

Held meeting of the Green Infrastructure Working Group - 11-21-24

- ▶ Discussed donated property.
- ▶ Used a task list for next year as a basis for discussion.
- ▶ Notes in the form of a list of topics discussed (see attached).
- ▶ One topic was whether we needed an actual survey of property as a starting point. Further discussion with Natalie M. was decided that it was not necessary if we were keeping it more “natural” with no structures.
- ▶ There are already some paths from neighbors on the property, according to photos taken from Mike L.
- ▶ Walkthrough will need to take place to see current condition of the property and take an inventory of plant material.
- ▶ Planning still in progress.
