

Question 1 - What flooding threats are the most problematic for the Town of Fenwick?

Response	Allocated Points (10/10 respondees)										Average
Storm surge flooding	3	10	20	20	30	30	30	50	50	65	30.8
Sea level rise	0	9	10	10	20	20	30	40	50	50	23.9
Daily tidal flooding	0	5	10	10	15	20	20	30	50	50	21
Flooding assoc. w/ rainfall	0	8	10	10	15	20	20	20	30	30	16.3

Question 2 - What flooding-related impacts do you feel are most imminent?

Response	Ranking (9/10 respondees)		
	1st	2nd	3rd
Accessibility or evacuation (street flooding)	5	3	1
Property damage (houses, cars)	4	3	2
Personal safety	0	3	6

Question 3 - What infrastructure deficiencies do you associate with flooding issues?

Response	Score (8/10 respondees)					Average
	1	2	3	4	5	
Low-lying topography (roads, bulkheads)				1	7	4.9
Undersized or unprotected drainage infrastructure		1	3	2	2	3.6
Inadequate physical protections		1		4	3	4.1
Over-development or lack of SWM	2	1	2	1	2	3.0

Question 4 - Which street in Fenwick do you think experiences the most flooding-related concerns?

Response (10/10 respondees)	Count
-----------------------------	-------

Bora Bora St	6
Dagsboro St	4
Bay St	4
N/S Schultz St	4
Essex St	3
Farmington St	3
Georgetown St	2
Mermaid St	2
Bayard St	1

Question 5 - Do you have any additional feedback or thoughts you'd like to share?

Open-ended responses (9/10 respondees)

Better tidal valves would make a big difference for run of the mill high tides and rainfall

The number of properties impacted by any mitigation project is a key to determining priorities

The sooner we can give individual homeowners specific guidance as to bulkhead or Hesco requirements the better.

Opinion polls are a good input, but ultimately decisions should be based on data

Consider placing water dams at the ditch and the Rehoboth Bay canal entrance; solves multiple towns' issues

Valid solutions that don't involve pumping

Do other towns flooding issues affect Fenwick and should we be working together with Dewey, Bethany?

Overall town drainage system

Must know what the state and county are planning (structures and laws/requirements)

How high by levees or bulkhead?

What flooding threats are the most problematic for the Town of Fenwick? 10 / 10

> Storm surge flooding

30 points average

> Sea level rise

23 points average

> Daily tidal flooding

21 points average

> Flooding associated with rainfall

16 points average

What flooding-related impacts do you feel are most imminent? 9 / 10

> 1 Accessibility or evacuation (street flooding)

> 2 Property damage (houses, cars)

> 3 Personal safety

What infrastructure deficiencies do you associate with flooding issues? 8 / 10

> Low-lying topography (roads, bulkheads)

4.9

> Undersized or unprotected drainage infrastructure

3.6

> Inadequate physical protections from waves or storm surge

4.1

> Over-development or lack of stormwater management

3
